AMMANN is a leading manufacturer of construction machinery and equipment. The company's products are used in a wide range of applications, including mining, construction, and infrastructure development. The image shows a large AMMANN machine, likely a conveyor system, which is used for transporting materials in industrial settings. The machine is situated outdoors in a dry, hilly environment, and a yellow truck is parked nearby. The image also shows a close-up view of a tall, industrial structure, possibly a conveyor system, which is used for transporting materials in industrial settings. The structure is made of metal and has multiple levels and a complex network of pipes and structural elements.
